

# LAVIT BEVERAGE SYSTEM WEEKLY MAINTENANCE GUIDE

Safety brewed  
together

As your coffee service provider, health and safety are our top priorities. The following guide provides information from the manufacturer on measures you can implement for safe use of your LAVIT beverage system.

For optimal sanitization of your Safety Brewed Together™ water station, we recommend the following thorough sanitization procedure is carried out regularly.

1. Wash and/or sanitize your hands prior to cleaning machine.
2. Turn off the power using the power switch located on the back right side of the unit.
3. Open the **chamber lid** and remove the blue **capsule tray** from inside the chamber by lifting up lightly. Clean in hot, soapy water. Rinse well.
4. Remove the **silicone nozzle** from inside the chamber by pulling gently inward. Clean in hot, soapy water. Rinse well.
5. Remove the **drip tray** and clean in hot, soapy water. Rinse well.
6. Place a heat resistant cup under the beverage outlet, holding it tight. Fill another heat resistant cup with very hot water. Pour into the chamber, hitting all areas. Repeat if necessary.
7. Wipe down all interior surfaces of the chamber with a clean cloth. Make sure the chamber is dry before replacing tray and nozzle.
8. Replace the blue capsule tray, silicone nozzle and drip tray when dry.
9. Wipe down the front and top of the unit with a clean cloth sprayed with disinfectant surface cleaner. **DO NOT SPRAY DIRECTLY ON MACHINE!**
10. For best results, dispense a cup of water before making a beverage for consumption.
11. Rewash or sanitize your hands after cleaning.
